

## ChemAxon Configuration Folder

The ChemAxon configuration folder is a location on disk where configuration is stored for various ChemAxon products.

The default location of this folder depends on the operating system used:

- Windows Vista or above: C:\Users\*USERNAME*\chemaxon
- Windows XP: C:\Documents and Settings\*USERNAME*\chemaxon
- Linux: /home/*USERNAME*.chemaxon
- OS X: /Users/*USERNAME*.chemaxon

A non-default folder can be used by setting the CHEMAXON\_HOME environment variable.
