

ChemCurator History of Changes

ChemCurator 18.1.0

New Features and Improvements

- Markush structure to text export

ChemCurator 17.5.0

New Features and Improvements

- Version number system change

ChemCurator 17.1.9

New Features and Improvements

- Configurable Markush validation options.
- Bond length checker removed from default checker configuration.
- Structure checker in compounds view.
- Major platform update.
- Bundled CLiDE update.

ChemCurator 17.1.2

New Features and Improvements

- Original name field in compounds view.
- Structure type field in compounds view.
- Create documents from online content.

ChemCurator 15.12.14

New Features and Improvements

- Project upload/download in context menu & toolbar.

ChemCurator 15.12.7

New Features and Improvements

- Easy manual annotation by fixing the text.

ChemCurator 15.11.23

New Features and Improvements

- New options panel for view settings and reorganize panels.

ChemCurator 15.11.16

New Features and Improvements

- Windows version of CLiDE bundled together with ChemCurator installer.

Bugfixes

- Sorting compounds table breaks hit coloring, reference linking, and selection consistency.

ChemCurator 15.10.26

New Features and Improvements

- Show missing doc reference for Markush fragments.

ChemCurator 15.10.19

Bugfixes

- Stereo is ignored during duplicate checking..

ChemCurator 15.10.12

New Features and Improvements

- Indicate for compounds (and fragments) whether they are linked to the document
- Add items to custom dictionary based on manual linking.

ChemCurator 15.9.28

New Features and Improvements

- "Open folder" in project context menu.
- Save validation result during structure list export.
- Persist zoom settings for project notes component

ChemCurator 15.9.21

New Features and Improvements

- Number of matching structures in validation view.
- Display indexes of exemplified structures in the list view
- Project notes.
- Don't allow duplicates in structure lists.
- Markush Composer wizard

Bugfixes

- Additional fields not created after compound list "make copy"

ChemCurator 15.8.31

New Features and Improvements

- Similarity filter in structure extraction wizard.

ChemCurator 15.8.24

Bugfixes

- PDF2Html installation bug solved.

ChemCurator 15.7.13

New Features and Improvements

- Improved text and image quality in PDF based projects.

ChemCurator 15.6.22

New Features and Improvements

- Improved text and image quality in PDF based projects.

ChemCurator 15.6.15

New Features and Improvements

- Pdf2htmlEX 0.12 bundled to Windows installer.

Bugfixes

- PDF based project creation failure in some cases.

ChemCurator 15.6.1

New Features and Improvements

- "Create Demo Project" in new project wizard.
- Improved more simpler project export dialog.
- Unified Mac and Linux installer.

ChemCurator 15.5.18

Bugfixes

- Apple retina display related document view bug

ChemCurator 15.4.27

Bugfixes

- IFI claims scrolling issue.

ChemCurator 15.4.6

New Features and Improvements

- IFI Claims Direct service 2.0 support.

ChemCurator 15.3.30

New Features and Improvements

- Copy/Paste of molecules between two sets of molecules.

ChemCurator 15.3.16

New Features and Improvements

- Display R-group alias instead of R-group number if it's exist.

ChemCurator 15.3.9

New Features and Improvements

- Non-hit visualization performance and correctness improvements.

ChemCurator 15.3.2

New Features and Improvements

- Non-hit visualization performance and connectivity improvements.

ChemCurator 15.2.23

New Features and Improvements

- NonHit visualization in Markush validation, highlights the non matching parts of the exemplified structure and the Markush structure.
- Exemplified structures validation coloring in Compounds view containing Markush exemplified structures.
- Synchronize selection in Markush view exemplified structures list and the corresponding Compounds view.

Bugfixes

- Hit coloring problem related H-fragments matching.
- Minor bugfixes.

ChemCurator 15.2.9

New Features and Improvements

- New selection, hit, error and warning visualization in Markush Extraction view.

- Improved IFI and Google Patents search field.
- Mac and Linux installer.

Bugfixes

- Some potential firewall issue solved by updating Google Patents resources download host address from www.google.co.in to www.google.com.
- Minor bugfixes.

ChemCurator 15.1.26

New Features and Improvements

- Automatic version update.

ChemCurator 15.1.12

New Features and Improvements

- Compounds file import option in project context menu.
- Faster compounds extraction and deletion of multiple compound records.
- Enable beta functions command-line option.

ChemCurator 15.1.5

New Features and Improvements

- New interactive Markush enumeration view.
- New more flexible compounds view with, calculated formula, molar mass, IUPAC name, moveable and sortable columns.
- Automatic scrolling to the added new row in compounds view.
- New compounds file import to project command-line function.
- Improved fragment recognition.

ChemCurator 14.12.8

New Features and Improvements

- Tab coloring, tabs associated to same project get the same color.
- Project explorer selection following the selection of the editor and viewer components.

ChemCurator 14.12.1

New Features and Improvements

- Automatic R-group conversion of labeled atoms recognized by OSR.
- Automatic download and insertion of images associated to the imported document from IFI CLAIMS.

ChemCurator 14.11.24

New Features and Improvements

- Command-line mode.
- Resizable Selection and Examples views.
- Automatic preview popup.

Bugfixes

- Unimportant warnings during annotation in some cases.

ChemCurator 14.11.17

New Features and Improvements

- Some icon replacements.

Bugfixes

- Editor components opened in wrong position in some cases.

ChemCurator 2014.11.10

New Features and Improvements

- ChemCurator Integration Server released.
- EditorFrame canvas get focus automatically.

Bugfixes

- Reset windows related bug fixed.
- Markush validation homology match highlighting fixed.

ChemCurator 2014.11.3

New Features and Improvements

- Configurable document annotation options.

ChemCurator 2014.10.27

New Features and Improvements

- Markush validation support homology groups.

ChemCurator 2014.10.20

New Features and Improvements

- Drag&drop allowed only from the corresponding document.
- Compound lists not allow query or Markush features.

ChemCurator 2014.10.13

New Features and Improvements

- "Help" feature added.

ChemCurator 2014.10.6

New Features and Improvements

- Dynamic enumeration count calculation in Markush view.
- Improved progress display.
- Validate Markush structure without edit it.
- Automatic scrolling when scaffold selected.

Bugfixes

- Manual linking error with Markush fragments.
- Generated sidebar in some cases is not hidden correctly.
- Project delete, rename throw various exceptions.

ChemCurator 2014.9.22

New Features and Improvements

- First public release.
