

Reactor History of Changes

Reactor 19.11

Improvements

- Selectivity rule threshold also considered during ambiguity check .

Bugfixes

- Some Linux and Mac OS related UI display bugs fixed.

Reactor 19.10

Improvements

- Ambiguity check now based on the number of possible distinct product instead of the number of theoretical reaction centers.

Reactor 17.9

Improvements

- SRU polymers support as reaction products.

Reactor 15.8.31

Improvements

- Reactor desktop application now uses the native look and feel of the operating system.

Reactor 15.6.22

Improvements

- Behavior of the --single Reactor option has been fixed/improved [[forum topic](#)].
- Removed --use-cache, --allow-duplicates, and --remove-duplicate-refs options from Reactor CLI.

Reactor 14.11.3

Bugfixes

- Reactor started enhanced stereo group numbering from 2 [[bug report](#)]

Reactor 14.7.21

New features and Improvements

- Product standardization was removed from Reactor application, `react` command line application, and Reactor Java API
